

eMazzanti Technologies at NRF Big Show to Present Revenue-enhancing Retail IT Solutions

NYC area retail IT consultant presents revenue-enhancing POS, IT infrastructure, PCI compliance and eCommerce solutions at top retail industry event

Hoboken, New Jersey -- (Cision) January 14, 2017 – eMazzanti Technologies, a New York City area retail IT services provider, consultant, and MSP, announced today that it will be meeting clients and prospects at the 106th annual National Retail Federation (NRF) Big Show, January 15-17, 2017 at the Jacob K. Javits Convention Center in New York City.

“Small and mid-size retail chains need a one-source technology solution,” stated Jennifer Mazzanti, President, eMazzanti Technologies. “eMazzanti partners with retailers to provide the services they need to enhance revenues and increase data security.”

With an A-Z list of over 3,000 retailers attending, the NRF Big Show provides education, networking and retail technology exhibits for retailers interested in everything retail. eMazzanti technology experts will be available assess retailer business needs and discuss retail IT solutions before, during and after the event.

Attendees and exhibitors interested in arranging a time to meet with eMazzanti’s retail IT consultants should call Ashley Hurwitz at 866-362-9926.

Retail IT Services

eMazzanti Technologies offers point of sale (POS) and retail IT infrastructure, [PCI compliance services](#), merchant services, retail print, [network security](#) and audio branding to provide retailers with a single-source technology partner. Services also include QIR POS application and terminal installation, EMV Chip and Pin technology migration, and credit cards for testing and training.

Cloud and Network Management Services

eMazzanti Technologies will also be on hand at the NRF Big Show to discuss the company’s cloud services and eCare Network Management Services, an all-inclusive IT security, implementation and support solution available for a flat fee per asset per month.

eCare solutions efficiently leverage existing hardware and software investments to provide increased speed and efficiency in day-to-day operations, enhanced security, and rapid, precision troubleshooting, repair and restoration.
