

Guard Depot Online Network Security Store Offers Enterprise-grade Small Business Cyber-security

WatchGuard network security appliances and subscriptions to protect smaller retail and multi-site businesses available from new Online Network Security Store

Hoboken, New Jersey -- (Cision) November 28, 2017 — Guard Depot, a division of eMazzanti Technologies and WatchGuard Authorized Online Reseller, today announced the launch of its e-commerce website, guarddepot.com. The new site offers enterprise-grade cyber security technology from WatchGuard at affordable price points for small and midsize enterprises.

With several tabletop, access point and [rack mount security solutions](#), as well as Basic Security Suite and APT Blocker subscriptions available for purchase online, the site offers a fast and easy way for small and midsize business leaders to acquire and deploy enterprise-grade cyber-security solutions to multiple locations.

“Retailers and small business owners must protect critical customer data and business assets from the rising tide of cyber-crime,” stated Guard Depot Project Lead, Almi Dumitru. “There is no simpler, faster or more cost-effective way to do that than through the Guard Depot online store.”

For over 20 years, WatchGuard has pioneered cutting-edge cyber security technology and delivered it as easy-to-deploy and easy-to-manage solutions. With industry-leading network security, [secure Wi-Fi](#), and network intelligence products and services, WatchGuard enables more than 80,000 small and midsize enterprises from around the globe to protect their most important assets.

Perimeter Defense

The Guard Depot site offers ideal solutions for small office/branch office and small retail environments. The WatchGuard Firebox T10, T30 and T50 security appliances, available on the site, create a [secure network perimeter](#) in remote locations lacking adequate security protection.

The WatchGuard Firebox T10-W is ideal for Small office/home office and small retail environments; and large businesses that need to extend UTM-level protection to remote workers. Available in wired and wireless models.

The T30-W and T50-W security appliances offer faster speeds and greater throughput than the T10-W. They are ideal for Small business, distributed enterprises, and managed security services providers (MSSP) seeking a powerful solution that can be quickly deployed in remote locations and centrally managed.

The Basic Security Suite subscription, also available from Guard Depot in one and three-year increments, includes all the traditional network security services typically found on a UTM appliance: GAV, IPS, URL filtering, application control, and reputation enabled defense. It also offers centralized management and network visibility, as well as remote 24x7 support.

Unified Threat Management

The comprehensive Unified Threat Management (UTM) technology found in WatchGuard Firebox products protects intellectual property and safeguards customer data, including credit card numbers, and other critical business assets from exposure and theft.

An all-in-one UTM security solution, such as those available on the Guard Depot site, integrates comprehensive network protection capabilities to secure business assets. All security features work together for a broad approach to network protection with a single console for reporting.

WatchGuard Access Points

The AP120 and AP320 access points, available from the Guard Depot online store, deliver enterprise-grade security and performance at an affordable price point. The AP120 provides enterprise-grade functionality at a fraction of the cost. This access point is ideal for branch offices, stores, and small classrooms.

The AP320 is perfect for busy environments with a diverse client ecosystem and Wi-Fi requirements. This high-horsepower access point can support critical applications like voice, video, and streaming cloud-based services with ease.

About Guard Depot

Guard Depot, a division of eMazzanti Technologies, believes in keeping business secure and worry-free. Specializing in protecting organizations from tomorrow's attacks today, Guard Depot is a premier provider of a range of enterprise-grade security solutions for organizations of any size.
