

## eMazzanti Offers Advanced Manufacturing Technology Live Virtual Sessions on NJMEP Manufacturing Day

*Hoboken manufacturing IT consultant partners with manufacturing automation provider to help companies with digital transformation at National Manufacturing Day event*

Hoboken, New Jersey -- (Cision) October 1, 2020 — eMazzanti Technologies, a [New Jersey Manufacturing IT consultant](#), invites manufacturing business leaders to participate virtually in tomorrow's Made in New Jersey Manufacturing Day Program organized by the New Jersey Manufacturing Extension Program (NJMEP).

The NJMEP event, held in conjunction with National Manufacturing Day, is scheduled to run from 8:00 am to 5:00 pm on Friday, October 2, 2020. The New Jersey Manufacturing Day will be 100% virtual this year and claims to be the largest networking event of its kind for the New Jersey manufacturing industry.

Get more information here and register for the [Advanced Manufacturing Technology: One Step at a Time](#) live virtual sessions.

eMazzanti's Co-Founder and President, Carl Mazzanti, will join Mark Howe, Vice President, Sales and Marketing of The Knotts Company to discuss Advanced Manufacturing Technology: One Step at a Time, in three live virtual sessions moderated by Peter Russo from NJMEP.

The panel will help manufacturers understand how they can take the initial steps toward digital transformation and how to adopt Industry 4.0 incrementally. Participants will hear how companies are transforming their businesses and preparing for the future. They can also experience the eMazzanti Virtual Exhibit Booth from 8:00 AM to 5:00 PM EDT.

### **Cyber-security Experts at NJMEP Manufacturing Day Event**

Manufacturing Day attendees connect with leaders in business and government. They experience the event from anywhere and develop relationships that help drive business forward. Furthermore, informative breakout sessions will tackle current manufacturing topics, including manufacturing cyber risks and exploring workforce strategies.

“Manufacturing remains high on the list of industries most vulnerable to cyber-attack,” stated Mazzanti. “As industrial technology advances, manufacturers increasingly use cloud, mobile, and data analytics to enhance connectivity and infrastructure. This presents a larger attack surface to cyber criminals.”

Facing increasing threats, many small business manufacturers lack the resources to manage cyber-security risks. The evolving nature of the risks and the shortage of cyber-security professionals make effective cyber-security a challenge for manufacturing organizations of all sizes.

The experts at eMazzanti Technologies work hard to stay on top of the fast-changing cyber-security landscape. They provide [manufacturing cyber-security technologies](#) to detect and block attacks. In addition, they design multi-layered proactive cyber defense solutions to mitigate manufacturing cyber-security risk. The company’s offerings include a variety of [24/7 network monitoring](#) and [managed services solutions](#).

eMazzanti’s comprehensive suite of manufacturing and distribution IT services also include network design and management, scalable Cloud solutions, IoT infrastructure, infrastructure as a service (IaaS), disaster recovery as a service (DRaaS), and compliance management. From consultation to implementation, management, and monitoring, eMazzanti’s expert team handles it all.
