

## Secure Wi-Fi Resources and Enable Your Remote Workforce with eMazzanti's Cyber Security Workshop Replay

*NYC area IT security consultant makes 2021 Secure Wi-Fi Workshop available to anyone online—in virtual cyber security workshop replay*

Hoboken, New Jersey - eMazzanti Technologies, a specialist in cybersecurity, is replaying on demand a workshop promoting secure Wi-Fi for your remote workforce. The informative virtual replay session addresses the landscape of 2021 Wi-Fi cyber-threats featuring Wi-Fi security experts from WatchGuard and eMazzanti Technologies.

### 2021 Wi-Fi Cyber-Threats Workshop On-Demand

The virtual event, "Enable Your Remote Workforce - Secure Your Wi-Fi Resources to Prevent Cyber Risk," is available any time for [replay on demand](#).

Here, Jim Steinbacher, WatchGuard Technical Evangelist for Wireless, delivers an interactive workshop focused exclusively on the biggest threat surface in 2021, Wi-Fi. Remote work has intensified the exposure to threats and leaders need to participate to ensure their businesses and employees are not at risk.

The ever-changing cybersecurity threat matrix requires business leaders to stay on top of every threat. This workshop presents how hackers frequently employ man-in-the-middle attacks, Wi-Fi Pineapples, and other threats to intercept home and mobile Wi-Fi data.

Interested parties may [view the Secure Wi-Fi workshop replay](#) now.

## About Jim Steinbacher

Mr. Steinbacher's experience with Wi-Fi began when he deployed his first wireless network (an 802.11b network with a whopping 11/Mbs max throughput) in 2001. Since that time, he has rolled out networks with each progressive IEEE standard, from distributed deployments across hundreds of sites, to ultra-high-density designs in NFL stadiums.

Through it all, security always seemed like an after-thought to network owners. Not anymore. Jim's current mission is to educate those responsible for Wi-Fi networks to the risks that they face from the ever-increasing barrage of Wi-Fi threat vectors.

Jim is currently the Technical Evangelist for Wireless at WatchGuard Technologies and holds a BSEE from Portland State University (and a PhD from the School of Hard Knocks).
