

Top Ranked Retail MSP eMazzanti Delivers Powerful Retail Technology Solutions

Once again, eMazzanti has secured its position as the top ranked [retail MSP](#) on the ChannelE2E Top 100 Vertical Market MSPs list. The list honors the foremost managed services providers (MSPs) in multiple industries, including retail, healthcare, not for profit, manufacturing, and additional market segments.

"After Nines Inc. congratulates this year's Top 100 Vertical Market MSPs," said Amy Katz, CEO of After Nines Inc., the digital media parent of ChannelE2E. "Businesses worldwide depend on the Top 100 Vertical Market MSPs for cybersecurity, automation and revenue-generating technology services – especially amid the coronavirus pandemic."

In addition to ranking highest among retail MSPs, eMazzanti ranked in the top third of all vertical market MSPs. These rankings are based on ChannelE2E's Q4 2020 and January 2021 readership survey, as well as ChannelE2E's vertical market industry coverage. MSPs on the list leveraged deep market expertise to support customers during a challenging year.

End-to-end Retail Technology Solutions

The 2020 pandemic caused disruption across the board, but some sectors felt the pain more than others. As shoppers stayed home, brick and mortar retailers saw their business plunge. Clothing stores, in particular, suffered huge losses. And here in the United States, small business revenue fell by 27.5 percent between January 2020 and March 2021.

Fortunately, eMazzanti delivers [retail technology solutions](#) to help struggling businesses navigate the storm and recover quickly. For instance, eMazzanti consultants have assisted retailers in expanding online retail solutions to respond to changes in purchasing habits. And they have expanded customized security solutions to counter increasing cyber threats.

Superior POS Technology

Through comprehensive retail payment technology services, eMazzanti enables omni-channel retailers to accept payments through a variety of methods. Online shopping carts, mobile payment apps and integrated point-of-sale (POS) systems can run simultaneously, with all transactions stored and searchable from a single location.

Agile Cloud and Mobile Solutions

To succeed, retail businesses depend on data. For instance, inventory management requires up-to-date sales data from multiple locations, including website sales and physical stores. Likewise, [mobile retail data](#) delivers valuable insights regarding customer buying behavior. Retailers use that data to inform marketing decisions and improve the buying experience.

Cloud services provide the tools for secure and affordable data collection and analysis. With real-time access to key data, businesses can adjust marketing, sales, and inventory quickly to capitalize on trends. eMazzanti assists retailers with cloud migration, offering scalable, secure solutions customized to address specific business needs.

Powerful Security and Compliance

For cyber criminals, POS systems present an attractive target, and cyber attacks on these systems prove both frequent and effective. eMazzanti understands the danger and provides comprehensive monitoring options and multi-layer security to protect sensitive data.

[PCI compliance](#) goes hand-in-hand with cyber security. A member of the PCI Security Standards Council, eMazzanti offers full compliance management services, protecting businesses and their customers.

Full-featured Network Management

Networks form the backbone of retail business, connecting systems and people and forming the gateway between your organization and the cloud. When the network goes down, business screeches to a halt.
